

Vario® is the fastest cable underfloor heating kit available. No primers, no tapes, no hassle and is guaranteed to save you valuable installation time.

- ✓ 7 conveniently sized kits available
- ✓ Unique TwistedTwin™ heating cable
- ✓ Safe for use in wet areas
- ✓ Unique pre-measured fixing strip
- ✓ Time saving installation process
- ✓ Adjustable output

NO PRIMERS, NO TAPES, NO HASSLE

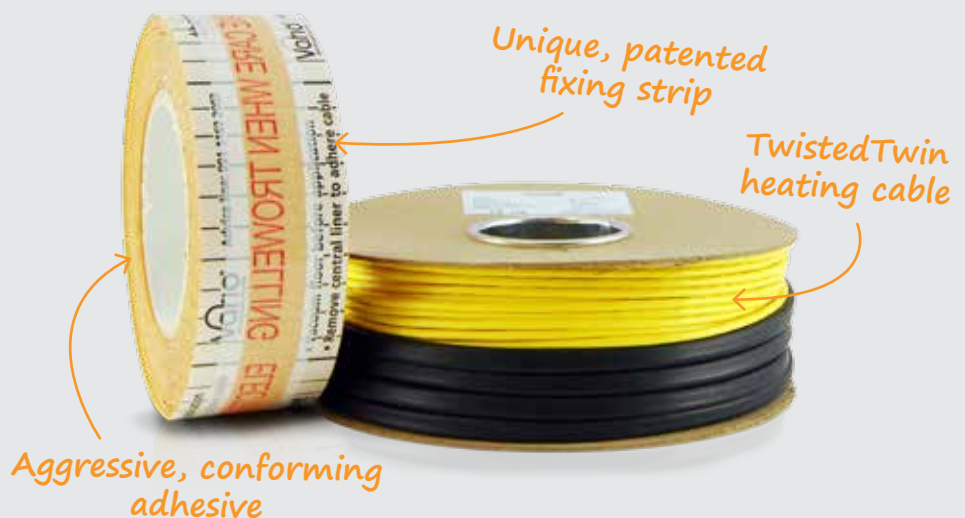

Vario's unique pre-measured fixing strip removes the need to prime measure and mark out your floor making Vario® the fastest underfloor heating cable kit available.

Designed for fast, flexible installation in small or irregular shaped rooms.

Vario® Electric Underfloor Heating eliminates the need for wall mounted radiators and gives you full freedom to design your room layout without compromise.

ENHANCE EVERY PROJECT

Enhance your project with Vario® electric underfloor heating. The Thermonet® feeling brings you the ultimate in comfort, luxury and after sales backup.

INCLUDED IN THE RANGE

- Vario® Kits - Including 5259
- Touchscreen Thermostat
- Vario® Kits - Excluding 5259
- Touchscreen Thermostat

WHAT'S IN THE BOX?

- Vario® cable dispenser
- Vario® fixing strip
- Factory test certificate
- Installation guide
- Thermostat & conduit kit (if purchased)

PRIMARY HEAT SOURCE

We recommend that you install Vario® with a spacing that achieves an output of at least 150W/m² with at least 80% floor coverage to ensure a primary source of heat.

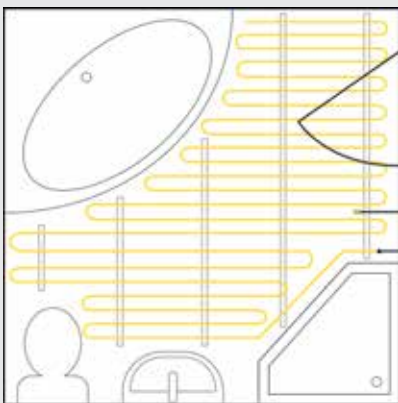

In older buildings with lower insulation levels or in areas of high heat loss it may be necessary to decrease the cable spacing to increase the output to at least 200W/m². This is recommended for use in conservatories.

Always use insulation to achieve a primary heat source and boost efficiency.

SECONDARY HEATING

When an existing primary heating system is in place, such as central heating, Vario® is suitable for providing additional warmth and comfort or take the chill off your floor.

Typical bathroom layout

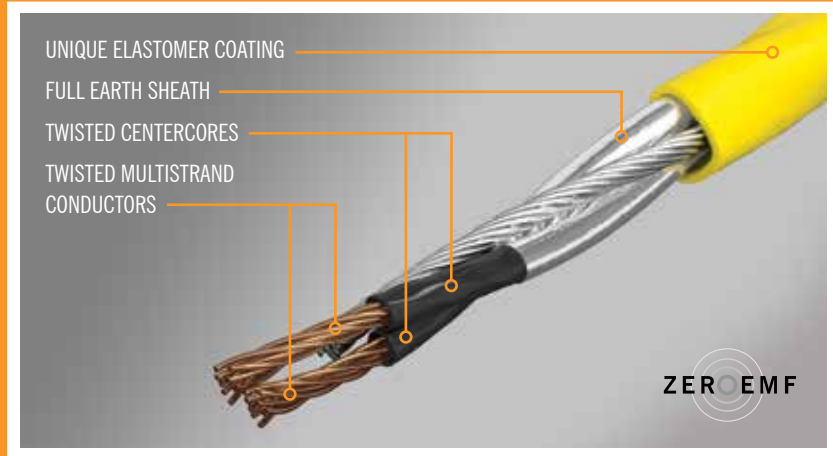

Cable Kits

Vario Cable Kits (including 5259 thermostat)

STOCK NO	KIT	LENGTH (M)	AREA (M2)	OUTPUT (W)
2102	2	13	1 to 2	185
2103	3	24	2 to 3	294
2104	4	31	3 to 4	424
2106	6	42	4 to 5	586
2108	8	55	5 to 6	767
2110	10	64	6 to 8	958
2112	12	87	8 to 10	1222

Vario Cable Kits (excluding thermostat)

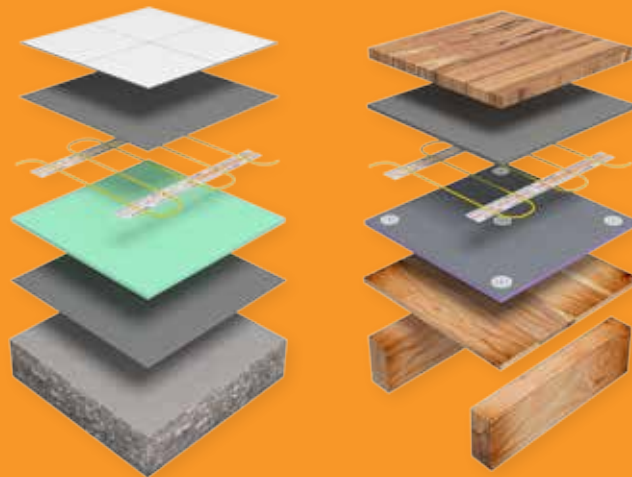

STOCK NO	KIT	LENGTH (M)	AREA (M2)	OUTPUT (W)
2202	2	13	1 to 2	185
2203	3	24	2 to 3	294
2204	4	31	3 to 4	424
2206	6	42	4 to 5	586
2208	8	55	5 to 6	767
2210	10	64	6 to 8	958
2212	12	87	8 to 10	1222

Truly unique TwistedTwin conductor cable...

Vario are the only underfloor heating mats in the UK to feature our unique TwistedTwin conductors. Most cables on the market have a dual conductor but as you'd expect, Thermonet has that little bit extra.

Our conductors are twisted together which eliminates electromagnetic field (EMF) and neutralises the expansion and contraction of the cable along it's entire length. This extra process results in a more robust, workable, and longer lasting cable. We're so confident in the quality of our products that we cover Thermonet and Vario with a unique Lifetime Warranty for complete peace of mind.

Use with different finishes and substrates...

You can install underfloor heating over timber or concrete substrates under a wide range of finishes including tiles, wood, carpet or vinyl. Always check suitability with your flooring manufacturer. Install a 10mm layer of self levelling compound when using floor finishes other than tiles.
